

# Learning FUN!

## Activity

Explore art in 3 dimensions!

### 3-D Star or Butterfly

#### Teacher-Made Activity

Unleash your 3-D creativity with splendid butterflies and stars!

#### You'll Need:

**T10078** Fancy Butterfly *Classic Accents*®

**T10086** Smiley Star *Classic Accents*®

Jump ring, chenille stem, glue or tape

#### Directions:

Watch butterflies and stars leap to life!

- **Butterfly:** Glue the center of **two** butterflies together, front to back.
- When glue is dry, fold the wings apart, so the butterfly can stand on its own.
- **3-D Star:** Fold **four** stars in half vertically.

- **Hint:** All folds need to meet in the center when stars are glued together. Begin by gluing two star halves together, matching fold lines. Continue until all four stars are glued together.
- Attach jump ring to the top of the star's point.
- Fasten chenille stem to ring, and curl it into a hook to hang your star.

What an imaginative way to add 3-D excitement to your space!

#### Make It Your Own:

Create a 3-D community using different **Classic Accents**® ... **dinos, frogs, teddy bears, and more.** Then use them as props in your very own play.
