

★ Featured Display

Subject: Math

Learning Objectives: Promote community spirit and practice math skills.

Plan for birthdays and celebrate students! Display the party scenes from this set and the month headers for the school year.

How many students have birthdays during the summer months? Use a calendar to show when June, July, and August half birthdays happen. Now everyone has a special day during the school year!

Ask for a show of hands for who has a birthday during each month. Count how many you'll celebrate each month and write the names on balloons. Include the half birthdays for those in June, July, and August. Add the bouquets to each monkey month header.

Extend the activity by solving math problems about the display:

- Which month has the most birthdays? The least?
- What is the total of September and December?
- How many birthdays are in the first half of the year?

– Are there less birthdays in the second half of the year?

What a great way to showcase students' special days and practice math!

★ You'll Need:

- T8341 Monkey Mischief® Birthday Bulletin Board Set
- T92660 Polka Dots Blue Terrific Trimmers®
- T9877 Red Terrific Trimmers®
- T98003 4-Pack Standard Colors Wipe-Off® Markers
