

Learning FUN! Activity

This little friend will zigzag into your heart and be right at home in the classroom. Create him as décor, or involve the class and make a really, really long caterpillar. Making and joining links is good practice for small hands.

Chain Link Caterpillar

You'll Need:

T-85113 Zigzag Motif Bolder Borders®

T-10589 Smiley Star Mini Accents

Scissors, tape or glue, and chenille stems.

Directions:

Cut the Zigzag Motif Bolder Borders® into 8 equal strips measuring $1\frac{3}{8}$ " x $7\frac{1}{2}$ ". Link the strips together by looping them through each other and securing with tape. Once the chain is complete, glue a Smiley Star Mini Accent onto the front of the chain for the caterpillar's face. Snip a chenille stem into two equal-length pieces, and attach them with glue or tape onto the top of the star for antennae. Give them some curl for cuteness.
