

Learning FUN!

Activity

Bring 3-D shapes to life!

Shapes Safari

Teacher-Made Activity
Introduce 3-D shapes in the classroom with an exciting, hands-on hunt!

You'll Need:

- T10636** 3-D Shapes *Classic Accents® Variety Pack*
- T23019** Make-Your-Own *Pocket Flash Cards*
- T10640** Monkey Mischief® Hats *Classic Accents® Variety Pack*

Crayons or markers, craft sticks, container, paper labels for sticks, and double-sided tape

Directions:

Learn to recognize 3-D shapes with an exciting safari that has students matching cubes, pyramids, and more to everyday classroom objects!

- Write "Shapes Safari" on one of the Monkey Mischief® Hats Classic Accents® and attach to container.
- Tape 3-D shapes to the top of craft sticks to make shape detectors.
- Write shape names on paper labels and attach to sticks.
- Children form teams, grab a shape detector, and begin the search. When an object of the same shape is found, they draw a picture of it on a flash card.
- Display drawings for all to see and brainstorm ways 3-D shapes fit into the world!

Make It Your Own:

Use your shape detector to find a 3-D shape at home! Make sure it's small like a can of soup or a mini flashlight, so you can bring it for shape show and tell.
