

Learning FUN!

Activity

Energize your space with an earth, sun & moon model!

Planets Classic Accents® Variety Pack

Super Satellites

Teacher-Directed Activity

Bring the solar system to life with this possible display!

You'll Need:

- T10091** Sun *Classic Accents*®
- T10047** Planet Earth *Classic Accents*®
- T10961** Planets *Classic Accents*® *Variety Pack*
- T38057** Solar System *Learning Chart*

Heavy card stock, double-sided tape, brads, and pocket folder for storage

Explore the wonders of the solar system with an exciting display that has students interacting with the sun and super satellites.

Directions:

- For each student, cut 1" strips of card stock measuring 8" and 5" long.
- Using brads, fasten one end of the short strip to the center of the moon and the other end to the center of the earth.
- Connect one end of the long strip to the center of the earth and the other end to the center of the sun.
- Once the models are complete, use them with the Learning Chart and Planets accents as shown for an out of this world discussion!

Make It Your Own:

Have a blast putting the planets in orbit order. Or break into small groups to research and write facts about the planets, Earth's moon, and the sun. Share your findings with the class.
