- ★ Dentist
Mr. Wang
- ★ Police Officer
Mr. Voss

MATCH HELPERS TO THEIR NAME

WHAT TOOLS DOES THE HELPER USE?

Aligns with Learning Standards

★ Featured Display

Who are the community helpers in your area? Make introductions by inviting various people to your class to discuss their career choice, the tools they use on the job, and the roles they play in the community. Encourage the class to ask lots of questions.

Create a display where your class can have fun matching community helpers with their tools. Have a student pick a helper from the pocket and, as a class, match the helper to his or her career title. After each matchup, engage kids in a discussion about how that specific helper benefits their community. Then, ask another student to pick from the tools pocket and, as a class, match the selected tool to the helper.

Expand the discussion with a focus on where in the community these helpers are found, using a chart to map out locations.

Add a game of charades to the learning fun! Have each student pick their favorite community helper and act out the helper's career without any words.

★ You'll need
