

Aligns with Learning Standards

★ Featured Display

Come and explore the farm and all its animal friends! Introduce the class to the animal moms and babies, pronouncing their names and discussing characteristics of the pairs as well as other items found on the farm – barn, fence, tractor, and grass.

Once the children become familiar with farm life, create an interactive farm scene for an exciting matching game. Ask a student to pick one name card from the pocket on the display and, with the help of the class, match the correct name card to the animal pair (mom and her baby).

Each day pick an animal pair on which to focus. Teach students about the animals, what they eat, and how they live. Kids love learning about animal families. Add to the excitement by visiting a nearby farm.
