

# Learning **FUN!** Display

## ★ Featured Display: Farm Family Fun

Come explore the farm and all of its animal friends! Create an interactive farm scene with animals scurrying among the barn and tractor. Laminate and cut out the animals for the game. Introduce the class to the animal moms and babies, reciting their names and discussing characteristics of the pairs. Once the students are familiar with the farm, it's now time for matching! Scatter the animal pairs on a table in a number that corresponds with the number of students participating. Ask each student to select one and search for the other half of their pair (mom looks for baby and vice versa). As each match is made, ask the

students to repeat the animal names and place them in the fenced-in area of the farm scene display with a piece of tape. Soon all of the animals are tucked back in their cozy corral. Each day pick a pair to focus on. Teach the students about the animals, what they eat, how they live, and so on. Kids love learning about animal families!
