

Color Bees T-8715

★ Featured Display: **All About Colors**

Give kids a variety of hands-on activities for learning colors. Frame your display area with trimmers and create your header with Ready Letters®. Use the set pieces for a teaching and reference display that shows primary colors and how they combine to create secondary colors. Set up the color wheel with missing pieces and invite kids to add the pieces to complete the wheel. Use cup hooks to create an interactive matching game that connects the Color Bees to their paint pots. Then designate a space for the "Color of the Week" and display student art and findings that show this color. You'll have endless learning fun with the Color Bees!
