

Multiplication Facts

Multiplication makes sense when students focus on one number family at a time with this interactive display.

★ Featured Display

As you introduce each multiplication family, add that bulletin board set piece to the display. Use two-sided tape to add pocket accents along the bottom of the display. Put a stick-on number on each pocket, and fill with some flash cards for that number family. Frame the display with trimmers. Students work in pairs or small groups to practice each number family with flash cards.

★ You'll need

- T-8257** Multiplication Facts Bulletin Board Set
